FAQ'S

How do I reheat?

This is our most asked question. Preheat your oven to 350°-375° and then follow accordingly:

- **Hors D'oeuvres:** start with 10 minutes; they only need a few minutes to warm up. You don't want them too hot or too cold.
- **Casseroles, Chicken, Beef, Pork or Lasagnas:** these are commonly in 9x13 inch foil pans. Keep the lid on for ½ hour, and then remove the lid to further heat and brown. Plan on 40 minutes.

All of our items are ordered by the pound. Typically, we recommend ½ pound per person. If you have a lot of items and want a larger buffet of food, then we recommend ¼ pound per person.

Usually we ask for at least 48 hours' notice for small orders. However, with larger events, we ask for as much advance notice as possible, especially during holidays and summer months.

It is impossible to fit all that we can do in this guide. If you would like something different or have seen something that you would like, just ask... We can do it!

DETAILS, DETAILS, DETAILS...

The more you know, the better our chefs can put together the best menu for you and your guests. Here are questions that we will ask you while planning your catering.

- **When, where, and what time.** This directly affects the type of food you will want for your event.
- **Allergies.** Who has them and what are they? We are suited to fit everyone's dietary needs.
- **What else are you serving?** Appetizers, main entrees, drinks, desserts, finger foods? We can help!
- **Supplies.** Do you need coolers, disposable serving ware, plates and cups? We have that! 2.50 per person.
- **Pickup.** Who's picking the order up and when? Always allow time for travel, traffic, and time in the store for checkout and to get everything loaded.
- **Is the food going to be hot or cold?** Plan on keeping hot foods hot, and cold foods cold. This means, don't leave your pasta salad in a hot car! *

* Did you know that it is NOT the mayonnaise that spoils, it's the ingredients with the mayo. Mayonnaise is considered acidic enough to be left out, but not the chicken or the onion in the salad. Simply adding a little acid to a salad or a dish can allow you to leave it out. But that doesn't make it resistant to extreme hot or cold. No one likes a wilted salad no matter how food safe it is.

PARTY PLANNING HELP

Here are some examples of real parties that we have helped cater.

Party at Matunuck Associations — 130 people
